

**MMBPIS Report to WMCMH Board
2nd Quarter FY 2019 (January – March 2019)
March 28, 2019**

On a quarterly basis, all Community Mental Health Service Providers (CMHSPs) compile data and report to Michigan Department of Community Health (DCH) on a number of performance indicators, compliance indicators, and monitoring measures. Below is a summary of WMCMH performance on 6 of these indicators.

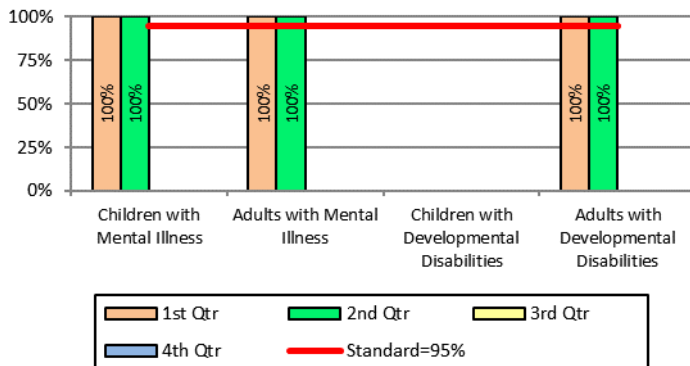

Percentage of Consumers Receiving an Initial Assessment within 14 Days of 1st Request

This graph shows the percentage of assessments (first appointments) which occurred within 14 days of the person's first request for services.

For the 2nd Quarter, WMCMH exceeded the State standard for all populations. No children with DD were assessed in the quarter.*

Timeliness from Assessment to Start of Care

This graph shows the percentage of consumers seen for the start of ongoing care within 14 days of initial assessment.

For the 2nd Quarter, WMCMH met the State standard for all populations served. No children with DD started ongoing care in the quarter.*

Service Entry Assessments – Second Opinions – 2nd Quarter FY 2019:

Total Number of Service Entry Assessments:	Number of Service Entry Assessments resulting in no further care at WMCMHS:	Number of Service Entry Assessments where Second Opinion was requested:
55	11	0

This table shows how the State measures ease for consumers to get needed services. There were no second opinions requested during 2nd Quarter.

*Note: MDHHS has determined that Autism Benefit Services should be excluded from the MMBPIS dataset. Therefore, children assessed and brought into care under the Autism Benefit are not included in this report.

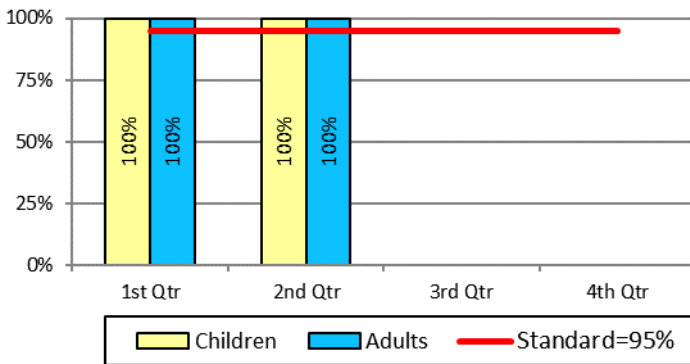

Percentage of Inpatient Screenings Completed within 3 Hours or Less

This graph shows the percentage of times WCMCMH clinicians came to a decision regarding hospitalization within 3 hours of request. For consumers requesting emergency hospitalization, the State mandates that 95% of these decisions must be made within 3 hours of the request for hospitalization.

For the 2nd Quarter, WCMCMH exceeded the State standard for all populations served.

Percentage of Persons Discharged from Inpatient seen within 7 Days

This graph shows the percentage of WCMCMH consumers who were discharged from an inpatient facility and were seen by WCMCMH staff within 7 days of discharge.

For the 2nd Quarter, WCMCMH exceeded the State standard for all populations served.

Percentage of Discharges Readmitted to Inpatient within 30 Days

This graph shows the percentage of consumers who leave an inpatient facility and are then readmitted for inpatient services within 30 days. The State standard is less than 15%.

For the 2nd Quarter, WCMCMH met the State standard for all populations served. Although the standards were met, there were outliers; WM did informal remedial action to prevent recurrence.

SUMMARY/CONCLUSION:

Outstanding Performance:

- Percentage of consumers receiving an initial assessment within 14 days of first request
- Timeliness from assessment to start of care
- Percentage of inpatient screenings done within 3 hours or less
- Percentage of persons discharged from inpatient seen within 7 days

Acceptable Performance:

- Service Entry Assessments – Second Opinions
- Percentage of discharges readmitted to inpatient within 30 days

Below Acceptable Performance:

- None
